Sleek Systems Private Limited

COMPANY PROFILE

Mission Statement

We believe in utilizing technology to make things simple and easy to use. We believe in thinking ahead and delivering products or services that can fit well with upcoming future technologies. Our mission is to maximize the rewards of our diversity and delivery capabilities by providing end to end solutions, which are easy to maintain and upgrade. Modular programming approach to provide innovative and easily manageable solutions, enabling customers all over the world to benefit from our services and products.

CEO's Message

As we get ready to usher in the new millennium replete with the new opportunities and challenges, it is becoming increasingly evident that the world will continue to shrink through the process of globalization and advances in the information technology. Those nations which have excelled in the past have done it by pushing the knowledge frontier outwards making it even more imperative for those who have lagged behind due to one reason or another to catch up and to do it fast. This catching up however requires improvement in the existing endowment of human resources and closing of the knowledge gap. The challenges of the coming century demand that knowledge based programs are initiated where information technology plays a central role.

Pakistan like other developing countries of the world is way behind in acquiring, absorbing, and communicating latest knowledge. An effective and efficient role on the part of private sector is the need of the next era, which is unambiguously the era of information technology. Let us join hands, to equip our new generation with the basic ingredients of the next millennium as this is our first and for most obligations for a prosperous Pakistan.

Shahid Ali
CEO

General Overview

Sleek Systems (Pvt) Ltd is a SECP registered organization, which is led by a group of IT & Networking experts, Solar Power Technologist and Mechanical Technicians enjoying their offices in almost all major cities of Pakistan. Sleek Systems (Pvt) Ltd had restructured their sphere of activity in Jul 2010. In 2011, the group entered in the education sector too with the name of **SCOPS** (Sleek College Of Professional Studies). Sleek Power Intelligence becomes the part of the Sleek Group in 2013. Sleek Systems (Pvt) Ltd is working both at wholesale and retail level markets, offering Solar Power System Solutions, Diesel Generators, CCTV Security Camera, Multimedia Projectors, Computers, Scanners, Printers, Networking and related accessories, Online Applications and Software. Besides we are enjoying an active network in Pakistan, to ensure best services to our esteemed customers. Keeping in pace with the growing needs of its customers, Sleek Systems has emerged as the leading "Complete Solution Company" in Pakistan, fully geared to handle complex projects on turnkey basis. The company being deal in major computer manufacturer HP/COMPAQ, DELL, ACER, INTEL, MICROSOFT, SONY and LAN / WAN connectivity solution companies like HP, D Link, TP Link & AMP obtains an edge over other organizations. Over and above the existing capabilities, Sleek Systems is also Deal in CISCO Systems, additional support in APC, Alpha, UPS, and HEWLETT PACKARD PRINTERS extends the accessibility of the company by providing it an edge over similar ones, to serve and satisfy our customers in much professional manners.

Company History:

Sleek Systems (Pvt) Ltd was founded in 2010 by a Group of IT, Networking and Finance Professionals. The Company, one of the best in Pakistan for selling HP/COMPAQ, DELL, SONY, ACER, INTEL, MICROSOFT, APC, ALPHA, CISCO, BAYNET, D-LINK, TP-LINK, AMP and providing power generation & software solutions, has now

been developed into an organization with in-built competence to meet industrial growth & demand pertaining to multifarious areas encompassing networking, multi-dimensional needs of National/Multi-National organizations.

The company has a full fledge Engineering department, in order to cater high-demands of services for organizations seeking for professional consultants.

Keeping in pace with the growing needs of its customers, Sleek Systems has emerged as the leading "Complete Solution Provider Company" in Pakistan, fully geared to handle complex projects on turnkey basis.

Management Hierarchy

The company based on three tier management hierarchy.

Corporate Governance

We are committed to excellence in corporate governance, transparency and accountability. This is essential for the long term performance and sustainability of our Company, and to protect and enhance the interests of our shareholders and other stakeholders. We regularly review our governance arrangements as well as developments in market practice, expectations and regulation. The Company's corporate governance system is based on the Board of Directors including Non-Executive Directors, which is responsible for deciding important operational matters for the whole Group and monitoring the execution of business by Directors, and External Auditors and Internal Auditors, which are independent from the Board of Directors and responsible for auditing the performance of duties by Directors.

Social Responsibility

Sleek Systems — a responsible corporate citizen- fully recognizes its Responsibility towards:-

* The countries and societies it deals with

* The environment it operates in

* The people it works with

This philosophy translates into action in the shape of three, guiding C principles:-

* Conviction for doing well

* Commitment to nature

* Courage to nurture

First class business in a first class way!

We strive to conduct our business in the most professional and ethical way possible. While we do work to earn profits for our shareholders, but we never compromise

that with our high standard of ethics and morals, and, the paramount interest of all of our stakeholders.

Customers lead our business

The orientation of our business is towards customers and their superior satisfaction. We cater to the global markets with products that are mass customized yet suit the individual needs of the respective consumer. Our products reflect our high standards and are developed and modified through persistent innovation while keeping in focus the dynamic needs of the most discerning of the users.

People are one of the most important assets

We recognize that one of our most important assets is our people, who work in our business, and, also, to a large extent the people who work for our business. We strive to constantly improve their standards as far as possible through our own Human Resource Management and Training systems. To us our people are also one of the most important stakeholders in our business. With this approach we try to provide a sustainable standard of living for them and offer them good working conditions.

We recognize the important role of technology in developing business. We continuously strive to use the appropriate utilization of cutting edge technology --- both in our processes as well as operations.

Quality Policy

Sleek Systems is committed to *"Total Customer Satisfaction"* through Quality in Product Support & Services, under strict compliance with Quality Management System.

Management responsibility is to provide direct leadership and resources to ensure continued conformance with the Quality system requirement. Our mission is to supply our customer with on-time delivery of products, which are of the best

possible Quality and consistently meet their design specifications and performance criteria.

A cornerstone of Sleek Systems Quality Policy is the excellence in product quality and customer service is the result of collective effort and commitment from all its team members. This commitment to quality shall be realized from the after-sales support.

OUR DEDICATED TEAM OF PROFESSIONALS IS BEYOND DOUBT, OUR MOST IMPORTANT ASSET.

Research & Development

With the cooperation and assistance of our Principals, our Research and Development cell is constantly working to develop specialized solutions for the unique and critical requirements of our customers. Such solutions are fully tried and tested in real environment created in our Labs & Workshops before being implemented. The R&D cell is equally geared to work and develop new ideas and solutions from the market feedback.

After Sale Services

Sleek Systems is continuously endeavoring to achieve par excellence standards of after sale services and maintenance with fully equipped computer engineering laboratory. These Labs are staffed by qualified hardware and software engineers and technicians at our facilities. All installations are back up with full warranty and subsequently by a comprehensive maintenance plan. We cater for repairs and maintenance of all kind of Generators, hardware, networks and peripherals.

Our Objectives

To optimize the level of customer satisfaction by meeting the growing office automation needs of the millennium, and developing the organization with in-built competence to meet industrial growth and demand pertaining to multifarious areas encompassing networking, multidimensional needs of National/Multi-National organizations.

The Company has the mission to render best possible and current solutions in the field of information technology, Solar Technology and GENSET Power Generation. We strive to offer our sale, services and advisories support to our customers to their entire satisfaction. The company has the aims to establish a foot holds as an organization to serve every one the best without compromising the professional standards as well as maintaining pleasant reputation with clients.

We wish to promote connectivity solutions, communications and awareness of personal computing by maintaining our standards and with our team of professionals in different segments.

Presently the application of solar power technology in Pakistan is growing at a very fast rate. Our objective is to keep pace with the developments in Information Technology by introducing the latest and state of art products and advanced concepts of data processing systems.

Consultancy

We at Sleek Systems (Pvt) Ltd provide consultancy on a turn-key solution basis in the field of power generation sector, networking and communications, multimedia, hardware, software, data processing and database management. The services include; engineering, design, planning & installation of the products and services. Our presales consultancy and expert advice has benefited many clients in

the implementation of the solutions. We believe that customers are a long-term business partner and strive to meet the requirements swiftly and professionally.

Maintenance, Support and Training Plan

We support our "Nationwide Customer Base" by providing personalized service (including parts, repairs, training and technical support) in a manner that would yield the following results:

* Enhance customer's productivity through comprehensive product knowledge and user training.
* Maintain highest level of uptime.
* Provide quickest possible response time to the customers.
* Provide low cost of maintenance to the customers.
* Enhance product life by offering preventive maintenance and extended warranty plans to the customers.
* A high degree of customer satisfaction.

Sleek Systems in coordination with its principals performs all necessary hardware and software maintenance services for computer systems, Gensets and Solar products during the warranty period and subsequently under annual maintenance contract. The maintenance services include the following three categories:

Preventive Maintenance: Preventive maintenance is performed periodically, which includes all cleaning, lubrication, inspection, testing, alignment and replacement of parts necessary to minimize equipment failure and extend its useful life.

Updates: All hardware engineering fixes and updates supplies by the manufacturers of the quoted equipment are installed with approval from the customer. Similarly, all software updates are implemented by Sleek Systems.

Corrective Maintenance: Corrective maintenance is performed promptly and efficiently when requested, and includes all actions taken to diagnose and rectify the equipment malfunction.

Uptime Level:

Sleek Systems in conjunction with its principals, guarantees a 90% "UP" time of the essential equipment. "UP" time is that period of time during which the essential equipment is fully operational and is calculated on a maximum of 8 hours per day, 6 days per week and 52 weeks per year basis. Extended up time may be committed if the customer agrees to meet necessary conditions.

Backup:

Sleek Systems maintains backup of similar performance for critical equipment. Backups are installed until the time the original equipment can be rectified and reinstalled.

Benchmark Testing:

If required, Benchmark testing is provided to customers before delivery.

Service Capabilities:

Sleek Systems over the years of experience has developed one of the most efficient support systems in the industry in Pakistan. Presently it maintains full-fledged office & workshop at Faisalabad where fully equipped hardware engineering laboratories and trained hardware and software personnel are providing maintenance support for the wide range of our products. Faisalabad office is staffed with hardware field engineers and systems and application software personnel who have had extensive training and experience on the products marketed by Sleek Systems. Direct technical support is also available on the telephone during working hours on working days.

For outstation clients, necessary training is provided to handle minor accidental breakdowns. A list of basic tool kit and critical parts is suggested to be maintained.

Levels of Customer Support:

Level I: On Site Field Support Which includes service, trouble shooting and basic repairs/replacements.

Level II: Lab/Workshop Level Support which includes reinforcement of engineers, components level repairs and stocking of parts at our main store. Head Office also carries out coordination to maintain our main supply line, technical and engineering services, consultancy services, product support and also liaison with the Principals.

Level III: Principal Level Support which includes training of our engineers, technical information and update materials and repair or replacement of parts which may need to be done by them.

Training

Comprehensive training sessions are conducted at client's or Sleek Systems premises on the products to cover following areas:

Operation of hardware, software and operating system

Basic troubleshooting and fixing of minor accidental breakdowns

Implementation of environmental control

For network clients only, system administrator training (preferably at customer's premises)

For office automation training for our preferred clients

Product Line:

Below is the list of our product range, in which we are optimizing our best talent to render efficient services to the best satisfaction of our esteemed clients.

Solar Power System:

Solar Power System used to be an outlandish energy idea that was fraught with more issues in terms of getting it to work than results. However, those were the very early days of the industry. Unfortunately, until people actually see the results and potential benefits of today's solar power options, many still refer back to those images from the 1980s when solar-power were still on the drawing board, so to speak.

Today's solar photovoltaic power systems are light years ahead of those early designs and haphazardous setups. The most modern systems use a method of sun exposure to generate electricity via semiconductors. Simple, direct exposure to the sun and its heat generate electrons that are then captured into the system and translated into electricity. The design can be used for a variety of things as small as powering a mobile phone to as large of a system as that needed to power your home, office and industry.

Further, the cost of installing a solar photovoltaic system has come way down from previous years. Where a system would have cost nearly 1200 Rupee per watt of energy produced in 1998, it now costs a tenth of that price in 2014. That makes the system far more available and more affordable for the users.

Solar electricity in 2014 is no longer an imaginary, fringe idea. With photoelectric cells and a solar electric panel system, one can easily reduce his electricity consumption and realistically reverse its cost by generating free energy after one time investment. As a result, everyone should at least consider the potential of installing solar photovoltaic power to overcome the increasing cost of national grid system power.

Our Goal

Our aim is to generate energy for the future. We develop, plan, build and operate solar plants and systems up to the multi-megawatt range and are a specialist wholesaler of turnkey photovoltaic plants and systems, solar modules, inverters and all other components of photovoltaic plants and systems. Solar power remains the most secure source of energy for the future.

Cooperating successfully with our customers and the sun, Sleek Systems is a leading company in the solar thermal and photovoltaic industry with installation of solar systems. As suppliers of solar installations we deliver holistically sustainable outcomes. We pride ourselves on being a very unusual enterprise, owned 100% by the people who work in it.

We are in dense partner networks

Our systems and service delivery are closely coordinated. We work with a dense network of selected solar craft partners and specialized installers.

We work reliably

From the first consultation to dispatch from our logistics center we focus on precise, customer-oriented outcomes. We regard smooth cooperation as one of the arbiters of quality.

We drive solar progress

We drive solar progress with our own development division. Our ideas and patents have shaped the solar energy industry.

Our Project Capability and Solution

Solar Heating System

We offer complete Solar Heating System for home/commercial and industrial needs.

Solar Power LED Street Lighting System

Solar Water Heater

Our Extensive Product Range

The Sleek Solar Power, solar range reflects our on-going commitment to a zero carbon lifestyle and a brighter future for us all. When it comes to creating efficient and cost effective energy solutions that address today's growing environmental concerns, the Sleek Solar Power, Solar range of products leads the way. We have an extensive product range as follows;

- Mono crystalline PV Solar Panels (100, 150, 200, 250) Watts
- Ploy crystalline PV Solar Panels (100, 150, 200, 250) Watts
- Solar Invertors
- Solar Charge Controller
- Dry Batteries (100 Amp, 200 Amp)
- Solar Water Pumps
- Solar Water Heater
- Solar Mounting
- LED Light (100, 120) Watts
- LED Lighting Pole

Sleek Systems Pvt Ltd.
1426/B, Chen-One Road, Peoples Colony No. 1 Faisalabad.
Contact: 041-8736256 - Cell: 0346-8666256 - Fax: 041-8736257 - www.sleeksystems.net

Diesel Generators:

* **Sales** (Diesel fuel and Petrol/Gas dual fuel)

* **Rentals** (Short & Long Term)

* **Services** (Repairing & Overhauling)

* **Maintenance Contracts** (Short & Long Term)

Sale:

Sleek Power Intelligence offers you maximum range of Generator sets, according to your demand.

Brands available: Nissan, Perkins, Cummins, Caterpillar, John Deere, etc.

Range: 10 KVA to 1000 KVA, Diesel fuel

10 KVA to 30 KVA Petrol / Natural Gas dual fuel

Other Items:

Soundproof Canopy and ATS – auto panel.

Rental:

Several businesses such as Banks, Restaurants, Offices, Multinational companies do not want to invest / block their funds in expensive generators for back-up power. This is especially true when expansion is a possibility.

Remember, usually generators cannot be bought or sold easily, and so, companies can rent back-up power from us. We provide complete solution, including diesel level, battery condition and hours run round the clock.

Therefore, you have no Liability and your Generator is ready all the time, to use.

Further all Rental Generator sets are Low Noise.

Services:

Sleek Power Intelligence has complete team for misc. services of your generators. Repairing & overhauling, moreover;

Our team can do PM and CM for the below on 24 x 7 bases:
* Diesel Genset
* AVR
* ATS Panels
* UPS
* Batteries

Maintenance Contracts:

Sleek Power Intelligence has complete team to provide services of generator sets, so we can well maintain your generator sets.

Maintenance Contracts can be done on Long Term & Short Term bases.

Preventive & Corrective MAINTENANCE of following equipment; Diesel fuel and Petrol / Gas fuel Power Generators.

* Diesel fuel and Petrol / Gas fuel Power Generators
* Scheduled Fueling of Gen sets
* Distribution Panels
* Battery / Rectifiers
* Sequence Controllers
* Fire Panel & sensors
* Fuel Tank Leakage
* Grounding
* Air-conditioners
* Line Conditioner

Software Solutions

Website Development

Mere existence on web is not sufficient nowadays. If a website has just static information, chances are that it will start losing visitors soon. If any website is just designed for a limited customer base, then probably the website maintenance staff will not care to update or even visit it. Using a separate application for administration, may lead to maintenance of data at two different places. On top, frequent application updates and maintaining multiple copies of same data at different places is a nightmare in itself. So, what is the solution? Why not have something at a central place which is updated frequently, allows you administration, gives you reports, and is available from any PC worldwide. Be it for a small office use or for a multinational corporate, a complete Web Application can serve it all.

Whether you are planning to have a web presence or already have a website, we enhance your websites by integrating it with unique web applications, so that your website is more than just an online brochure of your company. If you are new to web and want to establish a presence on the web, take a look at our:-

If you are thinking about framing a new application, you can opt for our web based application service.

You are already having an application and want to migrate some or all of it on the web; we provide various services to help you get there. We, at Sleek Systems, understand that the process of migration from a standalone application to a complete web based solution is usually done in phases and requires lot of testing or even data migration. We usually encourage our Customers to try it out in small & well defined pieces before transporting the entire application on the web.

We offer various web application services

* Add-Ons Website Components

* Web Interface to existing applications

* Module based migration to Web

Web Promotions

You have your website up and ready. It has all the features and good design. It's also fast and fancy. Great! But, where are the visitors? Who knows about the existence of your website? Is it listed in popular search engines like Google, Yahoo etc.? Are your friends and family the only people visiting your site? What about the rest of the world? What are those millions of people on the net doing? Which sites are they visiting? Why doesn't anyone ever visit your website? Just imagine, throughout the world, thousands of consumers are hooking up with new companies every day through their websites, and giving them business. Is your website fetching you, your share?

The first step towards enhancing your web presence is to have a well-designed web site.

But, creating a good website is only a small portion of the good work done. The other, and often the most crucial part is promoting your Web Site. Your website will not have frequent visitors unless it is well promoted and made popular to the rest of the world. Promoting a website can be a complex task and requires the help of experts with professional strategies.

We at Sleek Systems providing SEO services, website Promotion, Web maintenance, listing in major search engine and optimized mainly for Google, MSN, Yahoo and Alta Vista and others too. We will promote your website professionally so that it attracts maximum visitors at all times. We ensure that your website becomes popular and productive, bringing in new business opportunities for you. Our experienced professionals frequently update your website, so that you get new business from your website.

For your website to be promoted, we follow four crucial steps:

* Search Engine Listing

* Search Engine Optimization

* Free / Paid Directories submission

* Link Exchanges

Using these techniques will increases page rank (PR), Search engine Ranking (SERP) & backlinks in Google, Yahoo & MSN and will create maximum possible traffic on your website, which will eventually increase the number of potential customers for you. Our experts develop a well thought plan, according to your requirements, in order to maximize your client base and enhance your publicity campaigns. This helps you gain local as well as International Exposure. We guarantee you increased revenue and website popularity when you choose from one of our standard Web Promotion Packages.

Software Development

Sleek Systems offers a rich repertoire of software services to its clients seeking customized software solutions. Be it complete office automation or database driven solutions, Sleek Systems is the one stop solution center for all your software requirements. We provide you with customized software at competitive prices with free training and support. We offer exceptional performance and value in all our software products and services without sacrificing quality. It's our assurance that you get high quality software that would be unique and puts you on top of your competitors. We possess the potential of providing the best custom software services and hence Sleek Systems based at Pakistan, serves as just the right place for the Software development in Pakistan for your company.

Custom Made Solutions

Standard software usually does not cater to all your business requirements. Even the best fit software bundle will probably meet at the most 70% of what you actually want. Any standard software either does not meet all your requirements or the high end ones will carry features you will never use. So why settle for something that is not meant for you!!

Sleek Systems provide its clients with the exact tailor-made software solutions that will meet their specific business requirements. Our team of experienced and technical engineers will integrate application development with your line of business. We have a standardized software development methodology which helps us provide cost-effective and efficient software solutions to virtually any industry. This ensures you get a robust and error-free product to serve you better and provide you with the edge you deserve, over your competitors.

Customer Testimonials

Mr. Chaleon [Canada]

"Sleek Systems did a wonderful job on my website project. They were very efficient and professional every step of the way. I will be using Sleek Systems for future projects and I would definitely recommend them to others."

Mr. Khurram Shaikh [True Colors Corporation]

"Sleek Systems has gained expertise in delivering not only quick turnaround software projects large scale software solutions. In doing so, Sleek Systems delivery methodology has evolved incorporating the best-of-breed tools and techniques."

Mr. Farrukh Zaman [Klash (Pvt) Ltd - A Subsidiary of Klash Clothing, UK]

"We needed a defect tracking solution that would embrace our current processes within development, quality assurance and product management. Sleek Systems from Pakistan delivered the greatest versatility and functionality to meet our needs."

Mr. Farrukh Sahiq [M.B Textile - Faisalabad, Pakistan]

"Sleek System is good software house, they provide me Web Solution with good design, error free business logic along with reasonable deployment timeframe."

Mr. Muhammad Zubair [IT Manager, Shahbaz Spinning – Pakistan]

"I was using management system, the development of which seemed to have somewhat stagnated, and I was searching for a way to put into it a few of the features floating around that other software house had. That's how I found Sleek Systems. What better solution they give me as a replacement/upgrade for my management system.."

Mr. Muhammad Javaid [IT Manager, Sitara Textile Mills - Pakistan]

"It has been a pleasure working with Sleek Systems professional, efficient and creative team. They are available 24/7 throughout the process of application development. I will continue doing business with Sleek Systems in the future and certainly recommend their expertise to others. We would also like to go internationally for "e-Order". The tool really solved tons of our problems."

Mr. Wasim Riaz [IT Manager, Jaguar Hosiery Pvt Ltd]

Sleek Systems personnel are extremely committed and positive in terms of services. They are highly qualified, self-motivated and satisfactory persons regarding their responsibilities. We think that Sleek Systems is among the top rated IT Services/ Solution providers in our country..

Mr. Asghar [IT Manager, Faisal Plastic Industry]

Managing business has become an easy task for us. The use of the software ensures we are compliant and accurate every time. With all the features of the software module we are confident that we are getting the maximum benefit out of it.

Complete Accounting System with Sales and Purchases

Functions Overview:

* Unlimited Account openings.

* Different types of accounts (Suppliers, Customers, Employees, Expenses)

* Complete customized information about account

* Auto accounts information update.

* Single entry cash voucher with auto balancing cash account.

* Auto maintenance of cash book.

* Different banks handling with a single bank voucher.

* Auto maintenance of party ledgers.

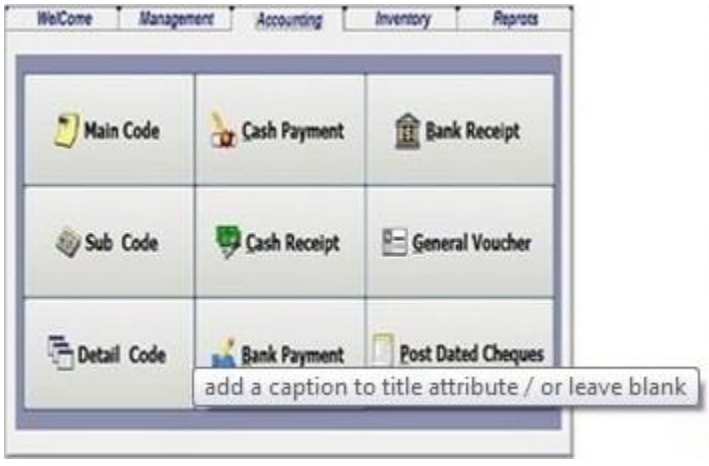
* Auto calculated P&L & Balance Sheet.

* Cash and fund flow statements.

* Customized options included.

* A complete Accounts Manager.

* Software extendable to multi-terminals.



Point of Sale

Functions overview

* Employees Profile Management

* A very robust mechanism of defining Promotional Offers

* A very strong mechanism of defining policy for Discount coupons.

* Products Management

* Supports the following product attributes

* Hierarchical Product category Management

* Support multiple currencies.

* Support multiple stores. Separate Sale price, opening qty, Minimum Quantity,

* Maximum Quantity and Re-order Quantity can be managed for every store.

Application Developed In:

.Net, SQL Server

Campus Management System

Project Overview:

Modules Available

* Admissions

* Academics

* Examinations

* Financial Accounting

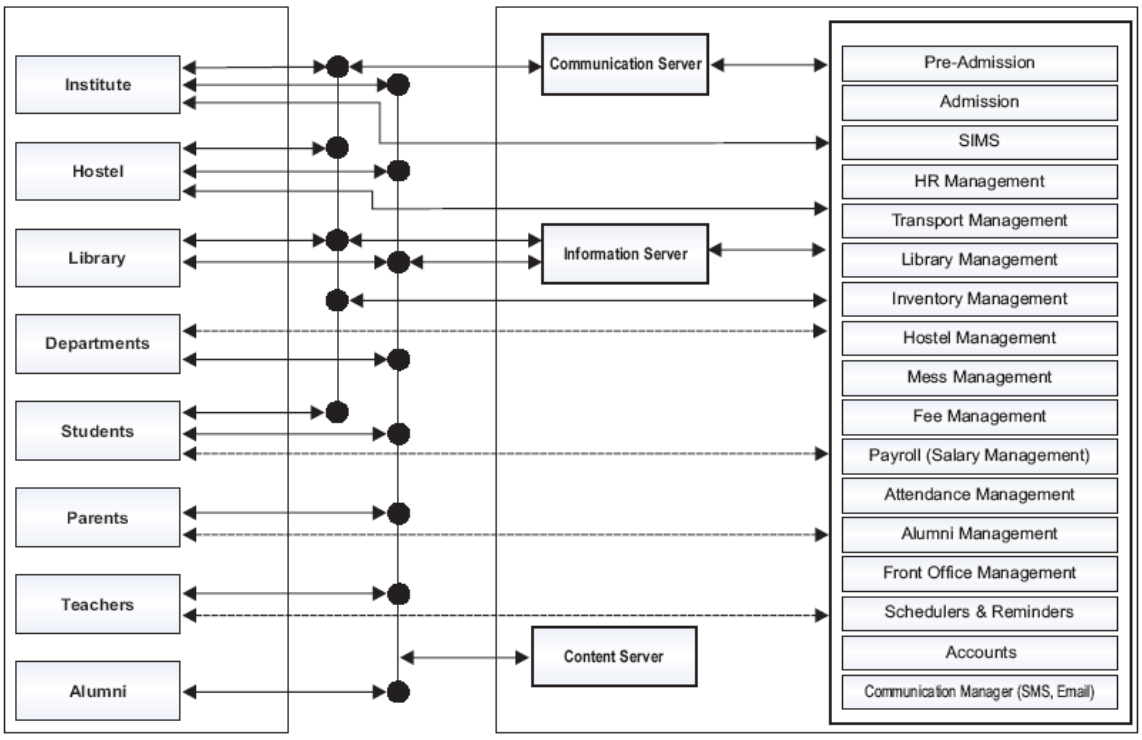
* Hostel Management

* Inventory Management

* HR/Payroll Management

* Library Management

* Vehicle & Transport Management



Paperless Account Inventory System

Functions Overview

Introduction:

* Sleek Authorization is basically developed to meet the mentioned objectives.

* It's totally a paperless environment which provides online, routing and approval of documents only from authorized users.

* It has set the same pattern in all the departments within the company and also facilitates the users to access their required documents in lighting speed.

* Moreover it's also reduced the overall stationary cost of the company.

* By this we completely moved from manual/traditional documentation to electronic documentation.

System has developed for:

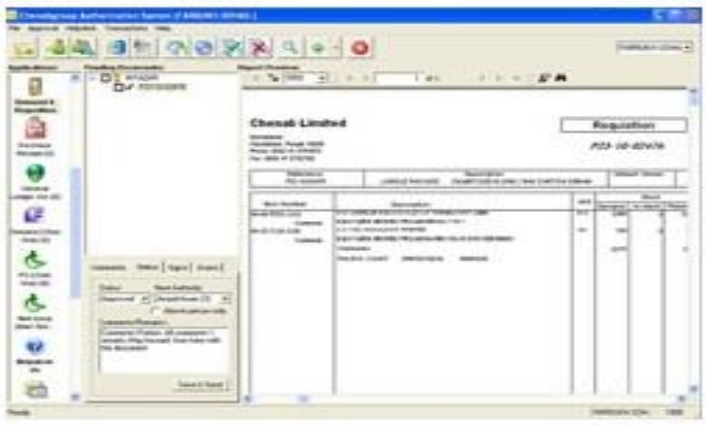
* Move on paperless environment to reduce paper and accessory cost.

* To develop more security with flexibility as only authorized access.

* To maximize the working (Operation) speed even in the absence of personals the works carry on.

* To set a same approval pattern in all departments with the organization.

* Online tracking/access for all important operational documents.



Hospital Management Information Systems

Functions Overview

* Can manage Multiple Hospitals/clinics.

* Fully integrated with Accounting Systems.

* Patient Registrations

* Doctors and Paramedical Staff Registration.

* Patients Medical History, Problems, Treatments and Laboratory Test Details.

* Complete Hospital management from Patients/Inventories/Assets/Employees and Healthcare Resources (I.e. doctors and paramedics).

* Laboratory Management System.

* Secrecy of the Patients medical Record.

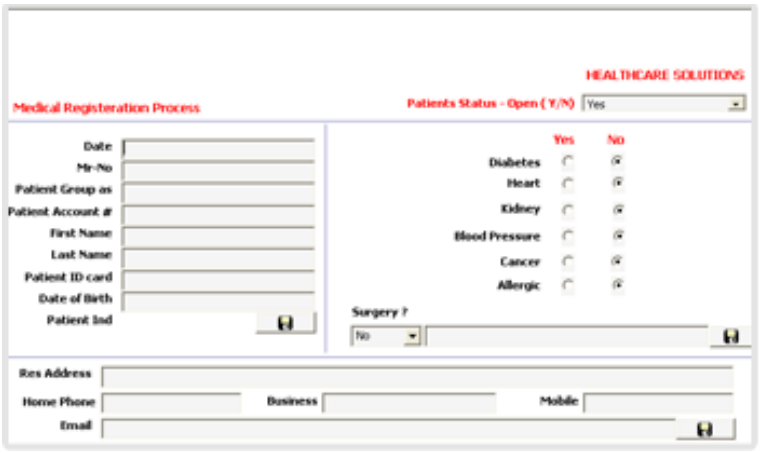
* Integrated human Resource Management System.

* Appointments and Calendars for Doctors/Patients.

* Patient Medical Records as well as Ledgers.

* Doctors' Appointments and Payments Records.

Oracle Form 6i – Oracle 10g



School and College Management System

The Sleek Campus Management system is an integrated solution which takes care of the various activities of an educational institution like College/School management, student management, Fee Generation and Collection, Financial and Human resource functions, etc. This Application is a desktop solution and upgradable to Intranet and Internet System. The Smart Card Facility or Biometric recognition can be added to meet specific client requirements.

Functions

* Student Information

* Human Resources and Payroll Management

* Hostel Management

* Inventory Management

* College Administration

* Library Management

* Financial Accounting

* User Accounts (Students As well as Faculty + Admin Staff)
